

Read these instructions before commencing installation & retain them for future reference.

IP20    240V

### Important Information

It is recommended that the track system is installed and fitted by a qualified electrician ensuring the installation complies to current IEE wiring regulations & local building control. These products are designed for use with the Escala Pro single circuit track system only. Any damaged parts should be replaced as soon as possible.

KSR will not accept responsibility for any claims arising from a sub-standard installation.

### Important User Advice

Always switch off mains supply before installing or servicing.  
This product is designed to be used indoors only.

### Installation Procedure

Familiarize yourself with the way the luminaire attaches to the track and ensuring the correct polarity. KSR open the lever(s) and insert the luminaire into track with the locking lever opposite the Live side (shown by the line on the track) then turn the lever anti-clockwise until the locking lever locks into the track lever touching the track, never force the lever see Fig.1.
